21 rue Sadi Carnot - 94880 NOISEAU (France)

MAINTENANCE AND SAFETY CONTRACT

"MAINTENANCE" SERVICE

- ✓ Our engineer makes a diagnosis of the machine.
- ✓ He checks the operation and accuracy of the measuring device.
- ✓ He ensures that routine maintenance is performed.
- ✓ He replaces parts and carries out repairs if needed once the price offer is validated.
- ✓ He carries out electrical and mechanical checks as well as miscellaneous greasing/lubrication operations.

"SAFETY" SERVICE

- ✓ He checks that the machine's safety systems are accurate and work correctly.
- ✓ He reminds staff about the instructions for use of the product safely and provides training for new users (users sign a training certificate).
- ✓ As the safety of the machine is closely connected with the safety of the drum rack, a visual examination of the drum rack is performed if necessary.

WHAT DO WE GUARANTEE?

AVAILABILITY OF SPARE PARTS

Our engineer's vehicle contains all of the spare parts usually needed.

WORK REPORT

You will receive a full report following the visit to inspect the condition and safety of your equipment.

SPECIALIST ENGINEERS

We specialise in the manufacture of winding machines and our engineers are experts.
